Energy, Environment, and Policy (INTA 3040). Developed teaching materials and converted course into distance- and/or executive education offering. Summer 2020.

Introduction to Comparative Politics (INTA 3203). Developed teaching materials and taught the course as part of the Summer Online Undergraduate Program. Summer 2020.

Government and Politics of Asia (INTA 2230): taught fall 2019 (44 students)

Smart & Sustainable Megaregion (INTA 4803-RJS): new course – developed and taught summer 2018 as part of the Japan Summer Program in Sustainable Development.

Japan Summer Program in Sustainable Development (JSPSD): Designed, secured approval, and recruited students for a new summer program focusing on sustainable development. The Program offers ten weeks of focused study in Japan. Through field trips, lectures, and a unique problem-based service learning experience, students will explore the broad issues of sustainable development with a particular focus on the challenges of sustainable urbanization in large cities as well as rural towns. The Program is envisioned to run annually beginning in summer 2017. New courses developed for JSPSD include: 1) Energy, Environment, and Policy (INTA 4813-RJS); and 2) Sustainable Global City – Tokyo (INTA 4803-RJS).

Environmental Politics. This course employs analytic tools of comparative politics and international relations theory to make sense of the politics of environmental policy across a range of issue areas in various national and supranational settings. The course includes a group-based module in which students the interconnectedness of environmental and energy policies in a simulation exercise focusing on particular country cases.

Ph.D. Proseminar: This course provides an overview of resources and practices of doctoral research in science, technology, and international affairs. It is a required course for students in the Doctorate in International Affairs, Science and Technology program.

The Japanese Economy: developed and co-taught (with Masato Kikuchi and James Hoadley) in spring 2008. This course is taught in Japanese as a capstone experience for students in the Global Economics and Modern Languages major.

Government and Politics of East Asia (INTA 2230): Provides an introduction to the major issues and aspects of the politics, societies, and cultures of East Asia. Utilizing multimedia materials, the course surveys Greater China (the People's Republic of China, Hong Kong, and Taiwan), Japan, and the two Koreas (the Republic of Korea and the People's Democratic Republic of Korea).

Japanese Society and Politics (INTA / Modern Languages Special Topics Course): Surveys key aspects of modern Japan's society and political system using Japanese-language readings, films, and other instructional materials. Co-developed and co-taught with Dr. Masato Kikuchi, School of Modern Languages.

American Government in Comparative Perspective (INTA 1200): Examines American government in relation to other political and economic systems in countries around the world. This course satisfies Georgia Tech's U.S. Constitution/Georgia Constitution core requirement.

Cross-National Society and Industry (INTA Special Topics Course): A survey of the cross-national differences and similarities in government-business relations among advanced industrialized countries (United States, Japan, Germany and France), newly industrialized countries (South Korea), and large emerging markets (China).

Japanese Management Practices (INTA Special Topics Course): An introduction to important aspects of management and business in contemporary Japan. The course examines the internal

characteristics of the Japanese firm (including personnel policies, labor-management relations, organization and leadership, financing), inter-firm relations, and government-business-relations.

Comparative Trade and Industrial Policy (INTA Special Topics Course): An introduction to the nature and implications of trade and industrial policies in the United States, Western Europe, and Japan. The course focuses on political and economic factors that influence the process whereby trade and industrial policies are initiated, enacted, and implemented in advanced industrialized countries.

U.S.-Japan Economic Relations (INTA Special Topics Course): An overview and analysis of the sources of conflict and cooperation in history's richest transoceanic trade nexus. The case study method is used to highlight important aspects of bilateral trade, foreign direct investment, exchange rate fluctuations, etc.
